

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY REGION 5

EMERGENCY RESPONSE BRANCH 2525 N. SHADELAND AVENUE INDIANAPOLIS, INDIANA 46219

April 7, 2017

VIA ELECTRONIC MAIL

Mr. Rex Osborn, Chief Federal Programs Section Indiana Department of Environmental Management 100 N. Senate Avenue Indianapolis, IN 46204-2251

RE: Request for Applicable or Relevant and Appropriate Requirements

For the Keystone Corridor Ground Water Contamination Site

Indianapolis, Marion County, Indiana

Dear Mr. Osborn:

The purpose of this letter is to request Applicable or Relevant and Appropriate Requirements (ARAR) for the Keystone Corridor Ground Water Contamination Site located in Indianapolis, Marion County, Indiana. The U.S. Environmental Protection Agency (EPA) is planning to conduct emergency removal actions at the site to mitigate threats to human health and the environment.

During the Remedial Investigation/Feasibility Study, EPA identified several properties with completed vapor intrusion pathways. Tetrachloroethene and trichloroethene (TCE) were detected in indoor air above Removal Management Levels. Additionally, TCE was detected above the Urgent Response Action Level at one property. EPA is planning to install vapor mitigation systems and conduct post-installation sampling to demonstrate that performance standards are achieved.

I appreciate your help in identifying any ARARs in a timely manner. A reply can be sent to me via e-mail at <u>Lam.Shelly@epa.gov</u>. If you have any questions, please contact me at (317) 417-0980.

Sincerely,

Shelly Lam, LPG

On-Scene Coordinator
